
MICRO P

MICRO P is a mixture of solid petroleum hydrocarbons. It consists predominantly of saturated branched and straight chain hydrocarbons with a microcrystalline structure.

Properties

Parameter	Typical value	Method
Congealing point, °C	67	ASTM D 938
Oil content, %	3,3	ASTM D 721
Penetration at 25°C, x0,1 mm	121	PN-82/C-04161
Saybolt color	15	PN-V-04016
Kinematic viscosity 100°C, mm ² /s	19,2	ASTM D 445

Application:

Manufacture of leather care products, furniture, cars,
Production of cosmetics (lipsticks, sticks, mascaras)
Manufacture of impregnation products,
Production of laminates,
Modification of technical lubricants,
Plasticizer for the production of rubber and plastic products.
